Murashige & Skoog Basal Salts

With Macronutrients, Micronutrients and Gamborg's Vitamins

Complete MS basal salts for the preparation of plant tissue culture media. Formulated with macronutrients, micronutrients and Gamborg's essential vitamins to support robust cell growth, organogenesis and in vitro micropropagation.

Complete Formula

Contains macronutrients, micronutrients and Gamborg's vitamins

Optimized Growth

Promotes healthy in vitro growth and development

Tissue Culture Quality

Ideal for a wide range of plant tissue culture applications

Consistent Quality

Manufactured under strict quality control standards

APPLICATIONS

- Preparation of Murashige & Skoog (MS) culture media
- Plant tissue culture and micropropagation
- Induction of shoots and roots
- Clonal propagation and plant regeneration
- Research in plant physiology and biotechnology

PRODUCT DESCRIPTION

Murashige & Skoog basal salts provide all the essential nutrients required for in vitro plant growth. This formulation contains macronutrients, micronutrients and Gamborg's vitamins for optimal growth, organogenesis and successful micropropagation of a wide variety of plant species.

CytoLyva

Murashige & Skoog Basal Salts

With Macronutrients,
Micronutrients and
Gamborg's Vitamins

REF

CTLV-0137-04

50 L – 1 Bottle

221,50 g

SPECIFICATIONS

Product Name :	Murashige & Skoog Basal Salts With Macronutrients, Micronutrients and Gamborg's Vitamins
Form :	Powder
Application :	Plant Tissue Culture
Size :	50 L – 1 Bottle
REF :	CTLV-0137-04
Net Weight :	221,50 g
Storage :	2–8°C

STORAGE & HANDLING

Store at 2–8°C

Keep dry

Protect from moisture and light

For laboratory use only
